

IRON SHOP

WOOD SHOP

A FIELD GUIDE TO

RESIDENTIAL FABRICATION

Our experienced locally owned and operated team at Work Shop Fabrication provides full service design, engineering, fabrication and installation for custom iron and wood work. We like to call ourselves functional artists.

The following is a high-level illustration of some of our most requested product categories.

STAIRS + RAILS

Artful in their installation, functional in their purpose; connecting above and below, through and between. Not only serving a purpose in the home, but our staircases also help to define the overall design.

KITCHENS

Kitchens are more than just a place to cook. They are the heartbeat of the home, a place to gather and break bread. Our functional art carefully tailored to our client's needs helps bring these cherished spaces to life.

GLASS PARTITIONS + DOORS

Metal and glass partitions offer a subtle division of space while providing unobstructed views.

CABINETS

Our cabinetry beautifully balances architectural concepts and design principles with trendsetting details, exceptional craftsmanship, and technical precision.
